

How to licence WINDOWS 10

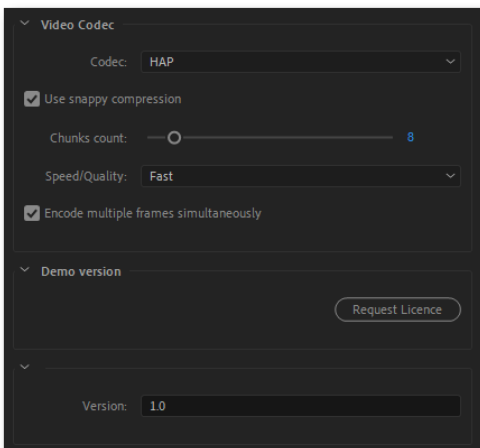

Run the .exe installer

At the "Install licence" file step, click on "next".
The plug-in will be installed as a trial version
(limited to an output of 250 frames watermarked).

At the end of the installation process, open Media Encoder
Add a "footage" to the "renderqueue" and select JokyHap Encoder

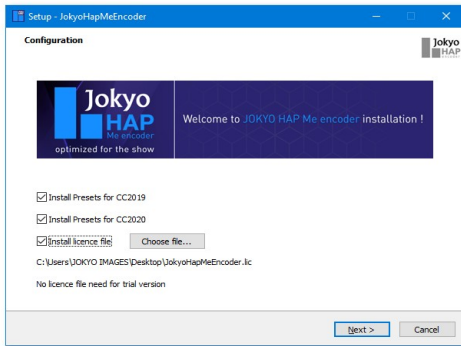

In the Export Settings dialog, click on Request Licence, to generate the request file for your computer.

A request file named JokyHapMeEncoder.ask will be created on your desktop.

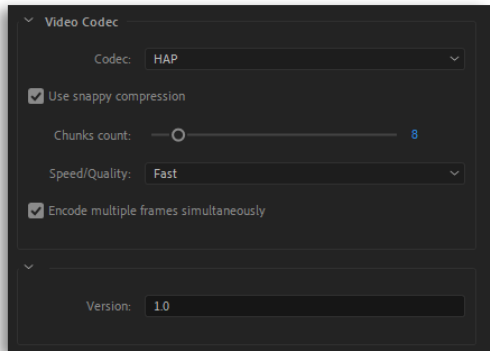

E-mail this file to licence@jokyohapencoder.com with your purchase order number.

It can take around 2 working days for the licence to be created.

You will then receive an email containing a file called JokyHapMeEncoder.lic

Run again the .exe installer.
At the Install Licence file step, choose the file JokyoHapMeEncoder.lic
and continue the installation process.

You can check on the Export settings dialog in Media Encoder that there is
no more "Demo Version" tab.
